- Artistic architectural drawings and illustration with graphic applications
- Experience with leadership and teamwork
- Good handling of Microsoft Office tools (Word, Excel and Power Point)
- Creativity and innovative ability

I have worked on various interior projects focusing on improving the quality of life for my clients. My scope is planning, researching, coordinating and managing these projects. Here are just some relevant jobs where I could use different skills and got really good results:

1. EN 2019 – 2020 – Full renovation project of a 1950's house in Hundvåg. Exterior and interior design. Still on Progress.
2. KH 2019 – Interior design house, landscape and several improvements.
3. SP 2019 - Renovation of entrance hall, stairs and bathrooms. Materials and colors.
4. MS 2019 – Full renovation of a 1960's house at Stokka. Interior.
5. HS 2019 – Interior design of social areas. Colors and furniture.
6. TS 2018 – Connection of two apartments into one and Interior Design. Lighting and furniture.
7. KL 2018 – Interior design of the social and children areas in a house at Grannes.
8. SY 2018 – Full interior design of an apartment at Bergsted.
9. JM 2018 – Renovation and turning a basement area into a social area for two brothers. Materials, colors and furniture planning.
10. JB 2018 – Full renovation of a 1960's house at Mariero, and creation of an extra apartment at the basement, according to the local rules. Colors, materials and furniture choices.
11. IS 2017 - Full renovation project in an old cottage and new extension house in Lingdal, Norway. Complete project including architectural development, interior design, material description, lighting and garden drawing.
12. CR 2017 – Full renovation of a 1950's apartment in Santos, Brazil. Complete change on materials, interior design of all the areas, decoration and lighting.
13. AH 2017 – Complete renovation of a 1960's house at Hinna. Colors, materials, furniture solutions.
14. KH 2014 - Total renovation of a 350m2 penthouse apartment in Santos town. This project was carried out through various stages from civil remodeling to interior design, passed through light and outdoor garden areas. On average, 30 professionals were involved in various stages of the work and were under my direct supervision all the time.
15. FO 2008 - Complete development of a 550m2 self-service restaurant of 500 seats in the center of Santos city, Brazil. This project was special in a way that we had to preserve and restore the 1850 building which was Architecturally protected by the municipality. The project had to respect various restrictions on reconstruction and still accommodate a modern and comfortable restaurant. An average of 30 professionals worked in the project under my supervision.
16. QV 2007 - 2008 - Development of a 250m2 restaurant in Sao Paulo City, from the architectural project to the decor, which involved different stages and took one year to finish. Gardening, lighting, furnishing and all production areas were carried out according to string tiles and regulations from me and a team of an average of 25 people.
17. SM 2006 - 2007 - Rebuilding an old residence in Santos town and transforming it into commercial activity as an emporium, which is a combination of different food areas, in the same place. This project was carried out from the beginning as a civil reconstruction with all the drawings involved and aspects developed as materials, lighting and gardening, to the installation of the shop, with visual communication of all sectors and exposure of the goods. This complete project was handled by different professionals at different stages, with an average of 20 people at each stage.
